This game is horrendous.

I got to the first statuesque creature and could not get away. The blinking is awful, how quick the thing moves is awful. Just awful.. This is a game that isn't that popular, but this is a good game. It has interesting art styles and interesting story lines. I would recommend this to anyone who wants to play a game that plays oddly but familiar.. I played this game back when gamecampus had this on their website i thought it was the best game ever now it has gone downhill with almost no player encounters and you do its a bunch of japanese people with anime plane avatars. 3/10 worth a try once every free. I do not Recmmend the dlc it will crash your game. i mean it was fun. it wasn't good but it was fun, if you know what i mean.. This is a Space Invaders clone in child art style. A good example of simplified art. In my opinion it is a good and funny game. But it has some problems with balance the biggest of witch is no ducking. Recommended for all except hard perfectionist and serious dudes ;-)

Tons of typos. Background music that doesn't loop properly (there's an annoying click and a break when it loops, and it loops every 10 seconds), annoying gameplay where you die and die and grind and have to collect money just to make it through the first level. No thanks. Play Space Run instead, you'll thank me later.. Patch 0.1 is live

Now the game is playable with the basic survival features,

A new map,

and more to explore

The game now runs on unreal engine 4

Even thow there may not be alot of things to do in the game yet

There will be alot more added, but you just have to be patient.. Phew, weird game. Looks in the videos much more interesting.

Unfortunately very soapy gameplay and really a very bad soundscape. Unfortunately, the graphics are also very old-fashioned.

And i found only one server ?!

3 / 10. Got it to work for a few hours of gameplay. Now it crashes everytime at the same point in game Day 2 00:38hrs. Tried getting in touch with Support, no help so far (Would be happy to change my review once this gets fixed) Love this game and wish there was something like it, just can't play it anymore thanks to the game crashing.

Update Got in contact with someone directly. Downloaded DRM version and works fine. Probably an error due to not being able to launch from steam and having to edit the registry for the game. Hoping a fix comes along in the future for other to enjoy this awesome but very old game.. My kids love this game, and it's actually good for a bit of stress relief. I really like knocking these penguins around with the hammer on the tarmac!

For a buck, it'll give you at least an hour of fun; but I recommend this game for kids ~5 to ~15. My 3 year old has trouble with the concept, she keeps hitting the penguins down instead of over lol.. The game itself looks very good. It's still not perfect, but I see great potential. Especially with multiplayer (when it will be released) and some polishing afterwards. But even now during Early Access this game worth its money.

More details:

* Graphics part is excelent! I unlocked most of the alleys and they are amazing. Every club is absolutely different. This is really cool for VR arcade game. Most of the other VR arcades have just one or at least a few locations. This game has a lot!

* Physics - can't say anything bad about this part too. I really like how it feels. Seems very natural. I tried to throw a hook several times and it works. But seems like all the balls have the same weight atm and it's not clear what weight it is. Please add weight number signs and make different weights. I wanna feel the difference.

* Career mode - please add leaderboards or just stats page. I want to see my score and rewards somewhere to check my progress.

* Challenges mode - I still can't finish career to play this mode in alpha access, but can't wait to play it when it will be ready! That gifs from anouncements look awesome!

* Settings - please increase max allowed resolution scale. 150 is not enough. 200 would be ok!

Devs, I hope to see new updates soon! Keep rolling!. right now is very very beta, it needs a lot of work of the developers, but is a good concept.
